

The Oracle UCM Connector for eCopy™ ShareScan® OP

Using the Oracle UCM Connector for eCopy™ ShareScan® OP, you can scan and index paper documents to the Oracle Content Server for storage and document lifecycle management.

The Oracle UCM Connector for eCopy™ ShareScan® OP allows you to quickly convert hard copy documents into digital files in Oracle Content Server folders and document workflows. Content information, such as Document Type, Security Group, Author and custom metadata, can be input at the digital copier or scanner. Content information can also be pre-set for each document type to minimize the amount of information that must be input at the scanner.

KEY FEATURES AND BENEFITS

- Scan directly from a digital copier or document scanner into Oracle folders
- Authenticate users at the scan device with electronic audit trail and compliance to corporate security policy
- Provide consistent user interface to reduce training
- Manage eCopy configuration through Oracle server administration pages
- Configure profiles for departments and work groups to minimize or eliminate input at the scanner
- Browse Oracle repository folders to select check-in location
- Restrict which document types a user can scan into the Oracle repository
- Support preview of scanned documents prior to check-in
- Easy to install, add-on module to any existing eCopy enabled digital scanners

Minimum Requirements

- > eCopy ShareScan OP v2.0 or higher
- > Oracle Content Server 10gR3 or higher

Supported MFP's

- > Canon
- > Fujitsu
- > Hewlett-Packard
- > Konica-Minolta
- > Oce
- > Ricoh
- > Sharp
- > Toshiba
- > Xerox
