Softlinx Announces Replix Enterprise, Java-Enabled Web Fax Messaging System

Network Faxing over Corporate LAN/private WAN/Intranet Infrastructure

Westford, MA, June 5, 1996—Softlinx, Inc. today announced the Replix Enterprise Fax Messaging System, a highly scaleable wide-area network fax solution for major corporations that leverage Internet/Web and Java to deploy scaleable, client/server fax messaging capabilities to corporate network desktops. This comprehensive, Internet/Web-based fax messaging system enables corporations to significantly increase workgroup productivity, dramatically reduce corporate fax telecommunications costs, and control mission critical faxing over their enterprise network infrastructure. " ...integration of fax messaging into the corporate network infrastructure brings immediate benefits of cost savings "

Dr. Hikyu Lee President Softlinx, Inc. "As major corporations are increasingly interconnected through their data network for their global operation, integration of fax messaging into the corporate network infrastructure brings immediate benefits of cost savings and productivity increase. Replix Enterprise delivers these benefits to enterprise customers with full fax function features for end-users and centralized administration and management capabilities for the IS managers leveraging Web and Java technology." said Dr. Hikyu Lee, President of Softlinx. "From a single departmental LAN fax implementation to a staged global deployment for multiple site locations, the open and modular architecture provides you a scaleable, network fax messaging solution and protects your investment over time."

The Enterprise System's distributed client/server implementation and scaleable modular architecture provides corporations with a versatile solution that can be configured to meet their different needs. For example:

Wide area fax savings: Save your company fax bills by deploying Replix on a wide-area TCP/IP network or the Internet and using the Least Cost Routing and In-Server routing capabilities to bypass the long distance toll calls.

Internet mail-to-fax: Use your investment in an installed e-mail infrastructure to seamlessly deliver fax documents to destinations both on or off the private WAN or Internet.

Remote Access Solutions: Replix voice integration provides fax-on-demand, remote retrieval of fax from any touch-tone phone, and provides integrated Web support for retrieval of fax documents.

Fax-enable your mission critical applications: Using Replix API, a corporation can enable their

existing mission-critical applications with network fax capabilities. For example, faxing would enhance trading floor applications, call center applications and more.

Replix Enterprise is a comprehensive family of client/server messaging software and systems that include:

- Replix Fax Client for Windows 3.1/95/NT, OS/2, Unix
- Replix Email-to-Fax Client for Netscape, Eudora, Lotus/Notes, cc:Mail and MS Mail
- Replix Enterprise WebFax Server for Sun, HP/UX, IBM AIX, and SCO/Unix
- Intelligent Fax/Voice Messaging Gateway for both digital and analog line support

Available today for shipping to major corporations, the Replix Enterprise Fax Messaging System delivers the following advanced features:

- High Scalability and Performance Central Administration and Remote Access via the Web
- Flexible Configuration Least Cost Routing Fault Tolerance with Automatic Switchover Seamless E-mail and Groupware Integration Remote Retrieval via Fax Mailbox API for Custom Application Integration Comprehensive Logging and Billing Support T1/DID/DTMF Support
