For Immediate Release

Softlinx Announces Replix[®] NT FaxCenter for Lotus Notes and Domino Version 4.1.1

WESTFORD, MA, November 21, 1997 -- Softlinx, Inc., a premier provider of Internet/intranet fax messaging solutions to large corporations and service providers, today announced the Replix NT FaxCenter for Lotus Notes/Domino Version 4.1.1, the most native, fully scaleable and reliable fax messaging solution for Lotus Notes/Domino users.

"Our goal is to not only provide the best native fax integration with Lotus Notes/Domino on the market but to also help organizations realize the importance of incorporating fax in their corporate electronic messaging strategy," said Dr. Hikyu Lee, president and CEO of Softlinx, Inc. "Replix V 4.1.1 is a customer-driven product. They wanted a more reliable, scalable and manageable solution for Lotus Notes/Domino. Replix V4.1.1 delivers all that and more."

Softlinx' technology provides a powerful, versatile and cost-effective solution that not only answers all the major requirements that organizations using Lotus Notes/Domino have, but also allows them to forge ahead in their corporate messaging strategy and increase personal productivity by incorporating fax as an electronic message type.

Replix V 4.1.1 capabilities include:

- Native integration within Notes and Domino
- Utilizes the Notes Name and Address Book
- Integration is accomplished through standard Notes APIs
- Status notification of inbound and outbound faxes via Notes email notification
- Web-based centralized administration
- E-mail to Fax, Fax to E-mail
- Supports attachments from a variety of file types from Lotus and Microsoft, as well as TIFF, ASCII, and Postscript

Softlinx' Replix V4.1.1 fits seamlessly into an organization's existing Notes or Domino environment enabling users to send faxes, receive faxes and get automatic fax status notification without ever leaving their desktop. By providing a completely familiar solution, there will be no special training or long learning curves for end users. They will see increases in personal productivity immediately.

Replix V4.1.1 uses the Notes/Domino name and address book that's already in the system. To send a fax, the Notes user simply selects a destination, hits send, and the fax is on its way. The Replix FaxCenter does all the work at the server. Inbound faxes are automatically routed to the receiver's Notes mailbox where they can be viewed by opening the fax attachment with any

standard image viewer.

Softlinx' Replix NT FaxCenter for Lotus Notes/Domino Version 4.1.1 also renders automatic status notification on all inbound and outbound fax transmissions. Notes users can track the status of faxes right from their Notes mail box. Administrators can use a browser to check the status of all faxes in queue, manage user accounts, configure servers, manage modem line connections and more.

The Replix V 4.1.1 provides a completely scalable solution that is based on a distributed architecture. So if departmental needs grow, there is no need to redesign the system, add more dedicated lines or make sacrifices. They simply add more gateways to support the volume. Organizations can also centralize fax traffic from multiple departments in a single high-capacity Replix Enterprise Fax Messaging Server. By having a distributed architecture, there is more room for growth and flexibility in configuring the fax system without having to overhaul platforms.
