

NEWS ANNOUNCEMENT

For Immediate Release

Softlinx Launches Year 2000 Upgrade to Replix unixFAX for Solaris to Enable Key Business Applications with Powerful Fax Automation

WESTFORD, Mass. (October 28, 1998)—Softlinx, Inc., the leader in enterprise fax messaging integration, today announces the release of their Year 2000 compliant version of Replix unixFAX Version 4.3 for Solaris. Replix unixFAX offers powerful, Internet/intranet fax messaging capabilities that not only ensure seamless interoperability with any application over the corporate network, but also provides integration of e-mail for company's constructing their unified messaging strategy. The Year 2000 certification will ensure the system will function properly in year 2000 and beyond.

The Replix unixFAX 4.3 upgrade not only delivers Year 2000 compliance but it also contains multiple enhanced fax features. By merging powerful fax messaging capabilities into the end users' existing mail system, users will find sending a fax as easy as sending an email. More importantly, fax can be integrated into business applications, such as mainframe legacy back office systems, over the company network allowing users to fax documents directly from their application. Inbound faxes can be viewed and managed right in their e-mail box with any standard image viewer.

"One thing that we consistently hear from our customers is how they receive innumerable benefits from having Replix unixFAX integrated into their business applications," states Frank Woo, Executive Vice President. "To further enhance personal productivity, the Replix unixFAX API enables end-users to have fax capabilities integrated into key business applications over the corporate network. Replix can be incorporated into any environment--such as trading floor applications, call centers, customer service, or for Internet distribution of information."

Replix unixFAX Key Features and Functionality

- **High Scalability and High Performance** - flexible architecture allows for incremental addition of clients and modem gateways, with the server capacity for unlimited users
- **Ease of Administration** - With a full set of central administration screens, administrators can check the status of all faxes in queue, manage and control user accounts and server configurations.
- **Seamless E-mail and Groupware Integration** - The Replix mail2FAX Gateway integrates with Lotus Notes, Netscape, Eudora, Microsoft Mail, cc:Mail (or any SMTP mail program) to provide an SMTP gateway that permits fax delivery and notification via e-mail.

- Least Cost Routing - With Replix Least Cost Routing, you can save time and money by routing a fax via a Replix modem gateway closest to the final destination for the receiving fax system
- T1/PRI/E1 Support - Replix provides network connectivity through a variety of digital interfaces
- Replix java KIT - Offers true platform independence by providing application developers with the Java classes required for interacting with the Replix Fax Server.
- Server Platform and Operating System Support - Sun Sparc - Solaris; IBM RS/6000 - AIX; HP 9000/700 or 800 - HP/UX; IBM Power PC -AIX
- Client Platform Support - Windows 3.1, 3.11, 95, NT; Email to Fax (for any SMTP client); X-terminals; Unix X/Motif.
