### **Softlinx Announces Availability of ReplixFax for Domino for LINUX Platforms**

**Westford, MASS. (January 27, 2001)**—Softlinx, Inc., the leader in enterprise fax messaging integration, today announces the availability of ReplixFax for Domino for LINUX platform. Retaining all of the enterprise features of the original NT-based product, ReplixFax for Domino is now available for the LINUX platform. ReplixFax for Domino offers powerful, Internet/intranet fax messaging capabilities that not only ensure seamless interoperability with any application over the corporate network, but also provides integration of e-mail for companies constructing their unified messaging strategy. Outbound faxes can be sent directly from the Notes mail client, as well as faxed directly from backend applications. Inbound faxes are received, viewed, and managed directly in the recipient's Notes mail file.

ReplixFax for Domino features:

- High Scalability and High Performance - flexible architecture allows for incremental addition of clients and modem gateways, with the server capacity for unlimited users
- Ease of Administration - With a full set of central administration screens, administrators can check the status of all faxes in queue, manage and control user accounts and server configurations.
- Seamless E-mail and Groupware Integration - The Replix mail2FAX Gateway integrates with Lotus Notes, Netscape, Eudora, Microsoft Mail, cc:Mail (or any SMTP mail program) to provide an SMTP gateway that permits fax delivery and notification via e-mail.
- Least Cost Routing - With Replix Least Cost Routing, you can save time and money by routing a fax via a Replix modem gateway closest to the final destination for the receiving fax system
- Replix javaKIT - Offers true platform independence by providing application developers with the Java classes required for interacting with the ReplixFax Server.

"Delivering to market an enterprise scale fax server based on the highly scalable UNIX platforms," states Frank Woo, president, "demonstrates our commitment to our customers' requests." "The UNIX platform" continues Mr. Woo "offers an attractive cost of ownership while retaining scalability in enterprise deployment. ReplixFax for Domino meets the enterprise need for a feature-rich fax server."

"IBM's commitment to open standards means you can choose the best hardware and software for each task. And it means that companies can easily integrate new applications with existing systems. This flexibility combined with the reliability of a scalable system results in a cost effective solution, and enables companies to contain and reduce their IT costs," says Greg Kelleher, LINUX Domino Product manager of IBM's Lotus Software group. "For these reasons,

ReplixFax for Domino was selected and implemented as IBM's internal solution in fall of 2001. We promote products that meet the flexibility, reliability, and price demanded by our customers. Softlinx' ReplixFax for Domino meets those demands!"

ReplixFax for Domino is available for all major UNIX-based platforms such as LINUX, AIX, Solaris and HP/UX; as well as, Windows NT and Windows 2000. ReplixFax for Domino with the Replix JAVA API toolkit bundle is currently available for prices starting at \$5,795.
