

NEWS ANNOUNCEMENT

For Immediate Release

Softlinx Releases ReplixFax SAP Connector that integrates Replix® fax messaging and SAPoffice™

Westford, MASS. (June 1, 2002) - Softlinx, Inc., the leader in enterprise fax messaging integration, today announced the availability of ReplixFax SAP Connector, connecting ReplixFax fax messaging software to STR Software's AventX™ SAP Connector. Softlinx has licensed the standard AventX™ SAP Connector software from STR Software, and has now released the integration from AventX™ SAP Connector to ReplixFax fax servers, enabling the faxing of printable documents, such as order acknowledgements, purchase orders, and other forms generated from SAPoffice™ and other applications on SAP. In addition, inbound fax documents can be received into SAP and subsequently routed to the intended recipient's SAPoffice Inbox.

“The ReplixFax SAP Connector is a logical extension to our Replix® messaging suite as we further expand our offerings to corporate enterprise customers,” according to Frank Woo, President of Softlinx.

Ben Bruno, President of STR Software, states: “We are always seeking to expand the market for our off-the-shelf ERP Connector products, with well-positioned companies like Softlinx.”

The ReplixFax SAP Connector requires minimal configuration of your SAP solution. Featuring solid, SAP-certified software, SAP Connector uses SAPconnect™, the standard interface between SAP and external communication systems, for version 3.1G or greater.

ReplixFax SAP Connector license is sold directly from Softlinx, and is available for ReplixFax for Windows v5.2 and ReplixFax for Unix v4.3.
