

NEWS ANNOUNCEMENT

For Immediate Release

Softlinx™ Becomes a Stellent Partner with Technology and Reseller Agreement

Westford, MA (August 24, 2005) –Softlinx Inc., an industry leader in fax and automated document delivery solutions today announced that it has entered into a strategic partnership with Stellent, Inc. Softlinx will integrate (DocuRouter™) a document routing engine for automated delivery of email, scanned and fax documents to link business applications and the Stellent® Universal Content Management™ system. The agreement also allows Softlinx to resell the entire Stellent Universal Content Management suite of products as a member of Stellent’s global network of Solution Providers.

Softlinx’ DocuRouter™ solution starts with a rule-based document routing engine with user-configurable business process rules and a document processing module. The complete solution is built with additional Source and Destination connectors to automate transfer of critical business information to multiple destinations according to your document automation needs. DocuRouter works in conjunction with source and destination application connectors to route the documents from one or more source applications to multiple delivery destinations in any manner including multiple deliveries in parallel or tandem actions.

“Stellent Universal Content Management will expand Softlinx’ existing capabilities by providing end-users an integrated solution for document delivery from the beginning to the end of the document lifecycle. This partnership combines a “best of breed” Content Management System with an automated document delivery system our existing customer base has been searching for. The industry has many point-to-point linkages of on-line information but very few offer multiple sources to multiple destinations based on specific business processes,” said Frank Woo, COO at Softlinx. Mr. Woo added, “With Stellent’s strong market presence and feature-rich capabilities, this expanded solution will address the requirements of customers in the areas of information gathering, analysis, collection and dissemination in industries like finance, manufacturing and the government sectors.”

“We are pleased to welcome Softlinx into Stellent’s partner program,” said Greg D. Cooke, vice president of North American channel operations for Stellent. “The integration of Softlinx Fax Server and DocuRouter with Stellent Universal Content Management will enhance content distribution for customers by increasing efficiency and control over the delivery of valuable business information.”
