

NEWS ANNOUNCEMENT

For Immediate Release

Softlinx® joins eCopy™ Connector Developer Program

North Billerica, Massachusetts (March 24, 2006) –Softlinx Inc, a leading supplier of enterprise fax server and integrated document management solutions for over a decade, announced today that it has entered the eCopy Connector Developer program. eCopy provides open and flexible solutions that rapidly integrate paper-based information into existing business processes and applications. eCopy products are used across all industries including legal, healthcare, financial services, manufacturing, and government, transforming the way companies access, modify, distribute, and share information.

By leveraging the eCopy technology, Softlinx is developing a Stellent Connector and Softlinx ReplixFax Connector for eCopy enabled network scanner and multi-function printer devices. The Stellent and Softlinx ReplixFax Connectors allow users to scan any paper document from eCopy enabled devices, and deliver it directly into Stellent Content Server repository or ReplixFax fax server for outbound faxing from any remote or central location.

“By adding this remote scan and electronic document delivery capability, Stellent and ReplixFax users now can extend the value of their current investment in the Stellent and ReplixFax system by adding remote scan support to their current infrastructure. Now Stellent and ReplixFax users can manage paper documents with more efficiency and less errors to support document lifecycle management and document delivery.” said Frank Woo, COO at Softlinx.

About Softlinx

Softlinx is a premier provider of Internet and Intranet fax messaging and integrated document management solutions for major corporations worldwide. With its Replix family of products, Softlinx provides customers with best-of-breed document communication solutions to streamline their business processes and exchange of critical business information. Founded in 1993, Softlinx, Inc. is a privately held corporation headquartered in North Billerica, MA.

About eCopy

eCopy, Inc., provides a simple, easy to use solution for turning any paper document into a digital file that can then be integrated into an e-mail, content management, fax, or enterprise application. Leveraging the existing networked digital copier or office scanner, eCopy is a convenient, low-cost departmental and enterprise solution for creating digital versions of paper business documents and distributing them easily and at virtually no cost via e-mail, fax, and secure Internet.
