Softlinx announces the release of ReplixFax for Domino Release 6.5

North Billerica, Massachusetts (April 10, 2007)—Softlinx Inc, a leading supplier of enterprise fax server, electronic document delivery management solutions, announced today the availability of ReplixFax for Domino release 6.5.

This new release supports expanded statistics reporting and enhanced document conversion capabilities. Highlights of the release include:

- Fax statistics can be reported in a more comprehensive and flexible manner by different parameters such as server, fax port and transmission status to provide users with detailed understanding of the system activities and tools to fine tune their system, especially for large enterprise customers of the ReplixFax system.
- Fax statistics can be saved in various formats including text file, MySQL and/or Notes database to support flexible reporting and bill back requirements.
- Incoming faxes can be converted to PDF format automatically by user configuration.

“ReplixFax for Domino is our flagship enterprise fax server product. We are not only committed to certifying the product to run with the latest release of Domino, but also listening to our customers on their product enhancement requests. This statistical reporting module is the result of the request and corporation from one of our customers who has deployed the ReplixFax for Domino Enterprise Fax Messaging System globally,” said Frank Woo, COO at Softlinx.
