Softlinx Announces ReplixFAX Release 7.0 with Fax Server Clustering and Virtual Fax Server Capabilities

The Built-in Fax Server Clustering and Server Virtualization Support Provide Scalable Performance, High System Availability and Improved Hardware Utilization

North Billerica, Massachusetts (January 28, 2008)—Softlinx Inc, a leading supplier of enterprise fax server and electronic document delivery management solutions, announced today the availability of ReplixFAX Release 7.0 for all Windows based platforms.

This new release adds an out-of-the box Fax Server Clustering capability that provides scalable performance and high availability of the ReplixFAX system in an on-demand fashion. The ReplixFAX server administrator can add additional fax server cluster members as needed when extra system performance is required. In the event of hardware failures or other unpredictable interruptions, remaining fax servers in a clustered configuration continue to operate for an uninterrupted business-critical fax processing. In addition the ReplixFAX Release 7.0 supports Fax Server Virtualization under VMware environment. The Virtual Fax Server configuration provides a number of benefits including better hardware utilization, cost savings and fast disaster recovery.

“Softlinx has been a leading provider of high volume, mission-critical business fax communication solutions over a decade for many global organizations. Offering the built-in fax server clustering and server virtualization capabilities is yet another testament of our commitment to the ReplixFAX product and our customers,” said Frank Woo, COO at Softlinx. “These major enhancements will allow our customers to flexibly manage their fax workloads, server hardware resources and take care of system availability concerns.”

Softlinx provides reliable, scalable network fax server and software products based on Internet and three-tiered distributed architecture. The ReplixFAX product family consists of fax servers for Windows, Solaris and Linux platforms and integrated with IBM Lotus Domino and Microsoft Exchange. The latest version is available now to all new and existing ReplixFAX customers.

About Softlinx

Softlinx is a premier provider of network fax and electronic document delivery solutions to major corporations worldwide. With its ReplixFAX enterprise fax server, DocuRouter intelligent document delivery platform, Document Connector products, and Oracle ECM consulting services, Softlinx delivers fast, quantifiable return-on-investment (ROI) to its customers by improving business efficiencies and eliminating costs associated with manual inefficiencies of handling unstructured content. Founded in 1993, Softlinx, Inc. is a privately held corporation headquartered in North Billerica, MA. For more information, visit www.softlinx.com.
