For Immediate Release

Softlinx Releases ReplixFax 7.2 with Oracle DB and Virtualization Support

This Latest Enhancement Release Offers Enterprise Scalability and Better Utilization of IT Resources

North Billerica, MA (February 25, 2009) –Softlinx Inc. (www.softlinx.com), an industry leader in enterprise fax messaging, content management and electronic document delivery solutions announced the general availability of ReplixFax fax server Release 7.2, an enhancement release to support Oracle database and VMware for all Windows based ReplixFax fax server platforms.

Benefits to both existing and new customers include cost savings from better server hardware utilization, scalable server configuration and performance, and optimized for VoIP network integration to support centralized IP fax messaging for mid-to-large organizations with multiple office locations.

“As large organizations deploy Fax over IP (FoIP) for consolidation and centralized control, efficient utilization of fax server hardware resources and scalability become increasingly more important.” says Frank Woo, Softlinx’ Chief Operating Officer. “By supporting Oracle database and VMware across all of our fax server platforms, ReplixFax messaging solution provide uncompromising performance and value on the market today to save IT costs and integrate with the rest of IT infrastructure easily to leverage their VoIP network for seamless fax messaging support.”

Examples of key enterprise fax server capabilities of ReplixFax Release 7.2 include:

- Fax Server Cluster configuration support for enhanced performance and disaster recovery
- Added support for Oracle database. Certified with Oracle 10g database. Supported on Oracle 11g database for fax database management
- Support of fax server virtualization for Microsoft Windows 2003 servers running in VMware
- Support of T.38 real-time Fax over IP (FoIP) via software-only as well as fax board based implementation
- Improved fax admin navigation of web admin pages

Softlinx’ ReplixFax Enterprise Fax Messaging solution, selected by IBM and many other leading global organizations, has been providing reliable and high performance IP fax communications to meet their mission critical business communication needs.
