

NEWS ANNOUNCEMENT

For Immediate Release

Softlinx' ReplixFax Messaging Solution Integrated with Hyland Software's OnBase 11.0

Softlinx becomes a technology partner of Hyland Software to integrate its ReplixFax fax messaging solution with the OnBase enterprise content management (ECM) solution.

North Reading, MA (July 20, 2011)—Softlinx Inc., a leader in Internet fax messaging and e-document delivery solutions, today announced that its industry leading enterprise fax messaging solution, ReplixFax has been selected by Hyland Software to integrate with its OnBase enterprise content management (ECM) solution. The integration, completed by Hyland Software in its latest software release, OnBase 11.0, ensures that OnBase users are able to easily leverage reliable and high performance, IP-based fax messaging capabilities both on-premise and in the cloud.

“Fax messaging is still the bedrock of any business communications – especially for business and legal documents such as invoices, contracts or purchase orders. By tightly integrating fax messaging capabilities with core enterprise software applications, businesses can maximize the benefit of automated document processes,” said Frank Woo, COO of Softlinx, Inc. “ReplixFax solution with its comprehensive set of Web Services integration toolkit allows Hyland Software to seamlessly integrate ReplixFax with OnBase applications.”

Fax is essential for certain industries such as healthcare. According to Gartner, “don't expect to impose alternatives to fax on your customers or business partners, and especially not in fragmented industries such as medical practices, where e-mail addresses are not customarily shared.” (Source: Gartner, Inc., *What to Do About Fax Before It Becomes a Problem*, Ken Weilerstein, November 16, 2010.)

About Softlinx

Softlinx is a leading provider of enterprise fax server, electronic document delivery and content management solutions to major corporations worldwide. Softlinx markets industry leading ReplixFax Fax over IP (FoIP) fax server and IP messaging gateway solutions to leading organizations and telecommunications vendors worldwide. Softlinx' fax automation and content management solutions deliver fast, quantifiable return-on-investment (ROI) to its customers by improving business efficiencies and reducing costs associated with manual inefficiencies of handling paper documents and unstructured content. Founded in 1993, Softlinx, Inc. is a privately held corporation headquartered in North Reading, MA. For more information, visit www.softlinx.com.

About Hyland Software

For more than 20 years, Hyland Software has been dedicated to meeting organizations' needs for document and process management with OnBase, an enterprise content management (ECM) solution suite. As OnBase has evolved through consistent and customer-driven product innovation, it remains focused on automating business processes that depend on documents, content and people to operate more effectively.

Tailored for departments and comprehensive for the enterprise, OnBase is designed to grow with organizations, whether it chooses an on-premise or software as a service (SaaS) model. OnBase enables more than 10,200 organizations across healthcare, financial services, government, insurance, higher education and manufacturing to be more efficient today and into the future. Leveraging more than 250 Authorized OnBase Solution Providers, Hyland's partner network, these organizations span 61 countries.
